

Mi Families facilitates programs for families, and those who work with families - Through provider trainings, parents workshops and youth services.

Youth services include 1on1, small group and large group “education through recreation” experiences - meaning we learn through hands-on fun!

Youth services may include assessments followed by developmental supports, tutoring or community referrals. Assessments define areas of strength vs struggles. Assessments are a tool to help strengthen struggles and are not meant to attach a “label” to a child. Labels can be helpful for additional assistance with parent request.

Parents may request programs to cover all developmental areas - or choose specific domains:

Emotional development / Self Regulation	(all ages/stages)
Communication / Speech	(infants thru teenagers)
Language / Comprehension	(infant thru teenagers)
Reading / Writing / Typing	(preschool through highschool)
Critical Thinking / Social Studies / History	(preschool through highschool)
Problem solving / Science	(preschool thru jr high)
Mathematics	(preschool thru elementary)
Study skills / Test taking / Attention span building	(preschool thru jr high)
Art / Music	(preschool thru elementary)
Fine Motor / Hand-eye coordination	(tots to tweens)
Large Motor / Balance	(tots to tweens)
Social skills / Team building	(all ages/stages)

Individual domains/subjects require a min 2 - 2hour sessions (apx 20\$/hr), Session timing and location depends on combined assessment areas. Some areas can be assessed at the same time. Assessment includes write up of recommended approach for furthering strengths to assist with struggles. Recommendations may include programs through community organizations or Mi Families (Adventure Academy tutoring). Recommendations are only recommendations, respecting “parents as partners,” and their decision how to utilize resources.
